Course summary

This course is particularly relevant for teachers, trainers and educators who are looking for new and innovative methods to teach and assess learners at a distance when they are not physically in school or on a campus. This free course introduces the use of innovative methods for assessment within secondary, further and higher education. The course is highly practical in nature and guides educational and training professionals through the process of introducing flexible formative and summative assessments that can meet the needs of a standardised curriculum. The course provides a practical approach to introducing innovative flexible assessment methods that are designed to improve the effectiveness of the assessment.

Learning outcomes

By completing this course, the learner should be able to:

- identify the usefulness of innovative assessment as well as the barriers and enablers
- facilitate flexibility for students to demonstrate what they have learned using mobile technology
- integrate mobile assessment into the taught curriculum
- evaluate the effectiveness of technology as a tool for formative or summative assessment.

Completed study

The learner has completed the following:

Week 1

What is innovative assessment and why is it useful?

Week 2

Aligning innovative assessment to your own environment

Week 3

Creating an innovative assessment

Week 4

Implement and evaluate your innovative assessment
